Acquired Best Formulations LLC. in the U.S.
Zhuhai Bonded Factory established

One-Stop Solution

We can provide One-stop solutions

- We deeply understand in the industry value chain, a contract manufacturer's value is to meet or exceed our client's expectations.
Offer client cost-effective help with our abundant production experience ---- Cost optimization guarantee product safety for clients with our comprehensive quality control system ---- Better quick response to customers' needs with our thoughtful service ---- Faster convenience of providing flexible solutions with our professional know-how ---- Easier
- With 30+ years of experience in the industry, we have a more profound understanding of market trends and customer demands, which enables us to offer more value-added services to support clients' sustainable development.
- **To make clients more powerful**
 - To offer support for clients' marketing decisions to avoid operational risk with our deep insight into the market
 - To offer support clients' product line upgrades with our powerful R&D ability
 - To create a strong alliance for clients, ourselves and upstream vendors to make our clients more competitive with our professional supply chain management capability

One-stop solution

One-Stop Solution

- **Insights into global market trends & technical regulations**
 - Professional team to study current global market trends, for fast adaptation of customers' changing requirements
 - In-depth knowledge of global regulations and technical standards for dietary supplements, in China, USA and the European Union, etc.
- **Ability to develop new formulas, new technologies and new dosage forms**
 - High level product development system to make concepts into real products
 - Help customers to improve product line, to build up customers' brand
 - R&D Centre with advanced preparation equipments and analytical instruments, making it possible to develop new formulas, new technologies and new dosage forms, and to carry out the quality research and the stability test. A new R&D Centre is being developed.
 - Study of global standards and analytical methods, such as USP, AOAC, FCC, BP and EP, to develop analytical methods to satisfy customer requirements and regulatory requirements of the exporting country
 - Development and validation of API analytical methods for new dosage forms and formulations, also analytical methods for plant extract identifications, food additive limitation analysis, solvent residues and pesticide residues, etc.
 - Taste masking technology and sensory analysis to improve product quality and make it pleasant to eat

300+
R&D TEAM

80
PHD & MASTER

- Team members come from prestigious schools
- **Documentation support**
 - Technical documentation support for registrations based on requirements
 - Keeping in contact with FDA in different markets, and be able to meet latest requirements

Softgels

Softgels

Starting its softgel production in 1993, Sirio has become one of the leading softgel manufacturers in the world. Owning three softgel facilities, two in China, one in Germany (Ayanda GMBH), we have extensive capacity to provide an efficient and reliable supply service for customers all over the world.

We are skilled in the production of complex formulas containing multiple active ingredients:

Multi-vitamins & Mineral

Omega-3

Plant extract supplement

Special dietary supplements

Plantegrity™ EnteriClear™ softgels are produced using Gellan Gum in a specialized one-step manufacturing process.

EnteriClear™ protects acid-sensitive active ingredients from degradation in the stomach.

TM

Excellent solution for products containing Fish Oil, Krill Oil, Garlic Oil, Peppermint Oil, Oregano oil, and more.

EnteriClear™ softgels key-benefits:

- Clear and smooth shell
- No reflux, aftertaste, or foul burps
- Plant-based, non-GMO, gluten-free, and sugar-free
- Better absorption
- Stable without cold chain

Gummy Technologies

Gelatin & plant-based gummy as well low-sugar and sugar-free options

GELATIN & PLANT-BASED

USDA ORGANIC CERTIFIED

POLISHED & SAND COATED

DOUBLE-LAYER

MULTI-COLOR

CENTER-FILLED

SWIRL

AERATED

Product applications

- Multivitamin nutritional gummy
- B-complex nutritional gummy
- Vitamin C nutritional gummy
- Calcium & Vitamin C nutritional gummy
- Milk minerals nutritional gummy
- Iron nutritional gummy
- DHA nutritional gummy
- Coenzyme Q10 nutritional gummy
- Krill Oil nutritional gummy
- Astaxanthin nutritional gummy
- Collagen nutritional gummy
- Lutein ester nutritional gummy
- Fibre nutritional gummy (Inulin, Polydextrose)
- Other nutritional ingredients nutritional gummy

Other Delivery Formats

Tablets

- Advanced technique: fluidized bed with automatic granulation
- World-renowned equipments: high-speed tablet press and coating machines
- Totally-enclosed materials-delivery-system conforming to the principles of modern engineering
- Meet the requirements for production of various types of tablets including effervescent, chewable and coated tablets

Product applications

- Vitamin C chewable tablets
- Vitamins & minerals tablets
- Acerola cherry chewable tablets
- Vitamins minerals effervescent tablets
- B-complex tablets
- Glucosamine + Chondroitin + Calcium tablets
- Cranberry chewable tablets

Powder

- Advanced automated equipment can produce products ranging from 1-30 g in stick/sachet and 200-450 g in can to meet demands of diversified packaging

Product applications

- Protein powder
- Fruit-vegetable fibre powder
- Direct drinking powder (cranberry, acerola powder, etc.)
- Probiotics powder
- Collagen powder
- Dha calcium powder
- Meal replacement powder
- Sports nutrition

Capsules

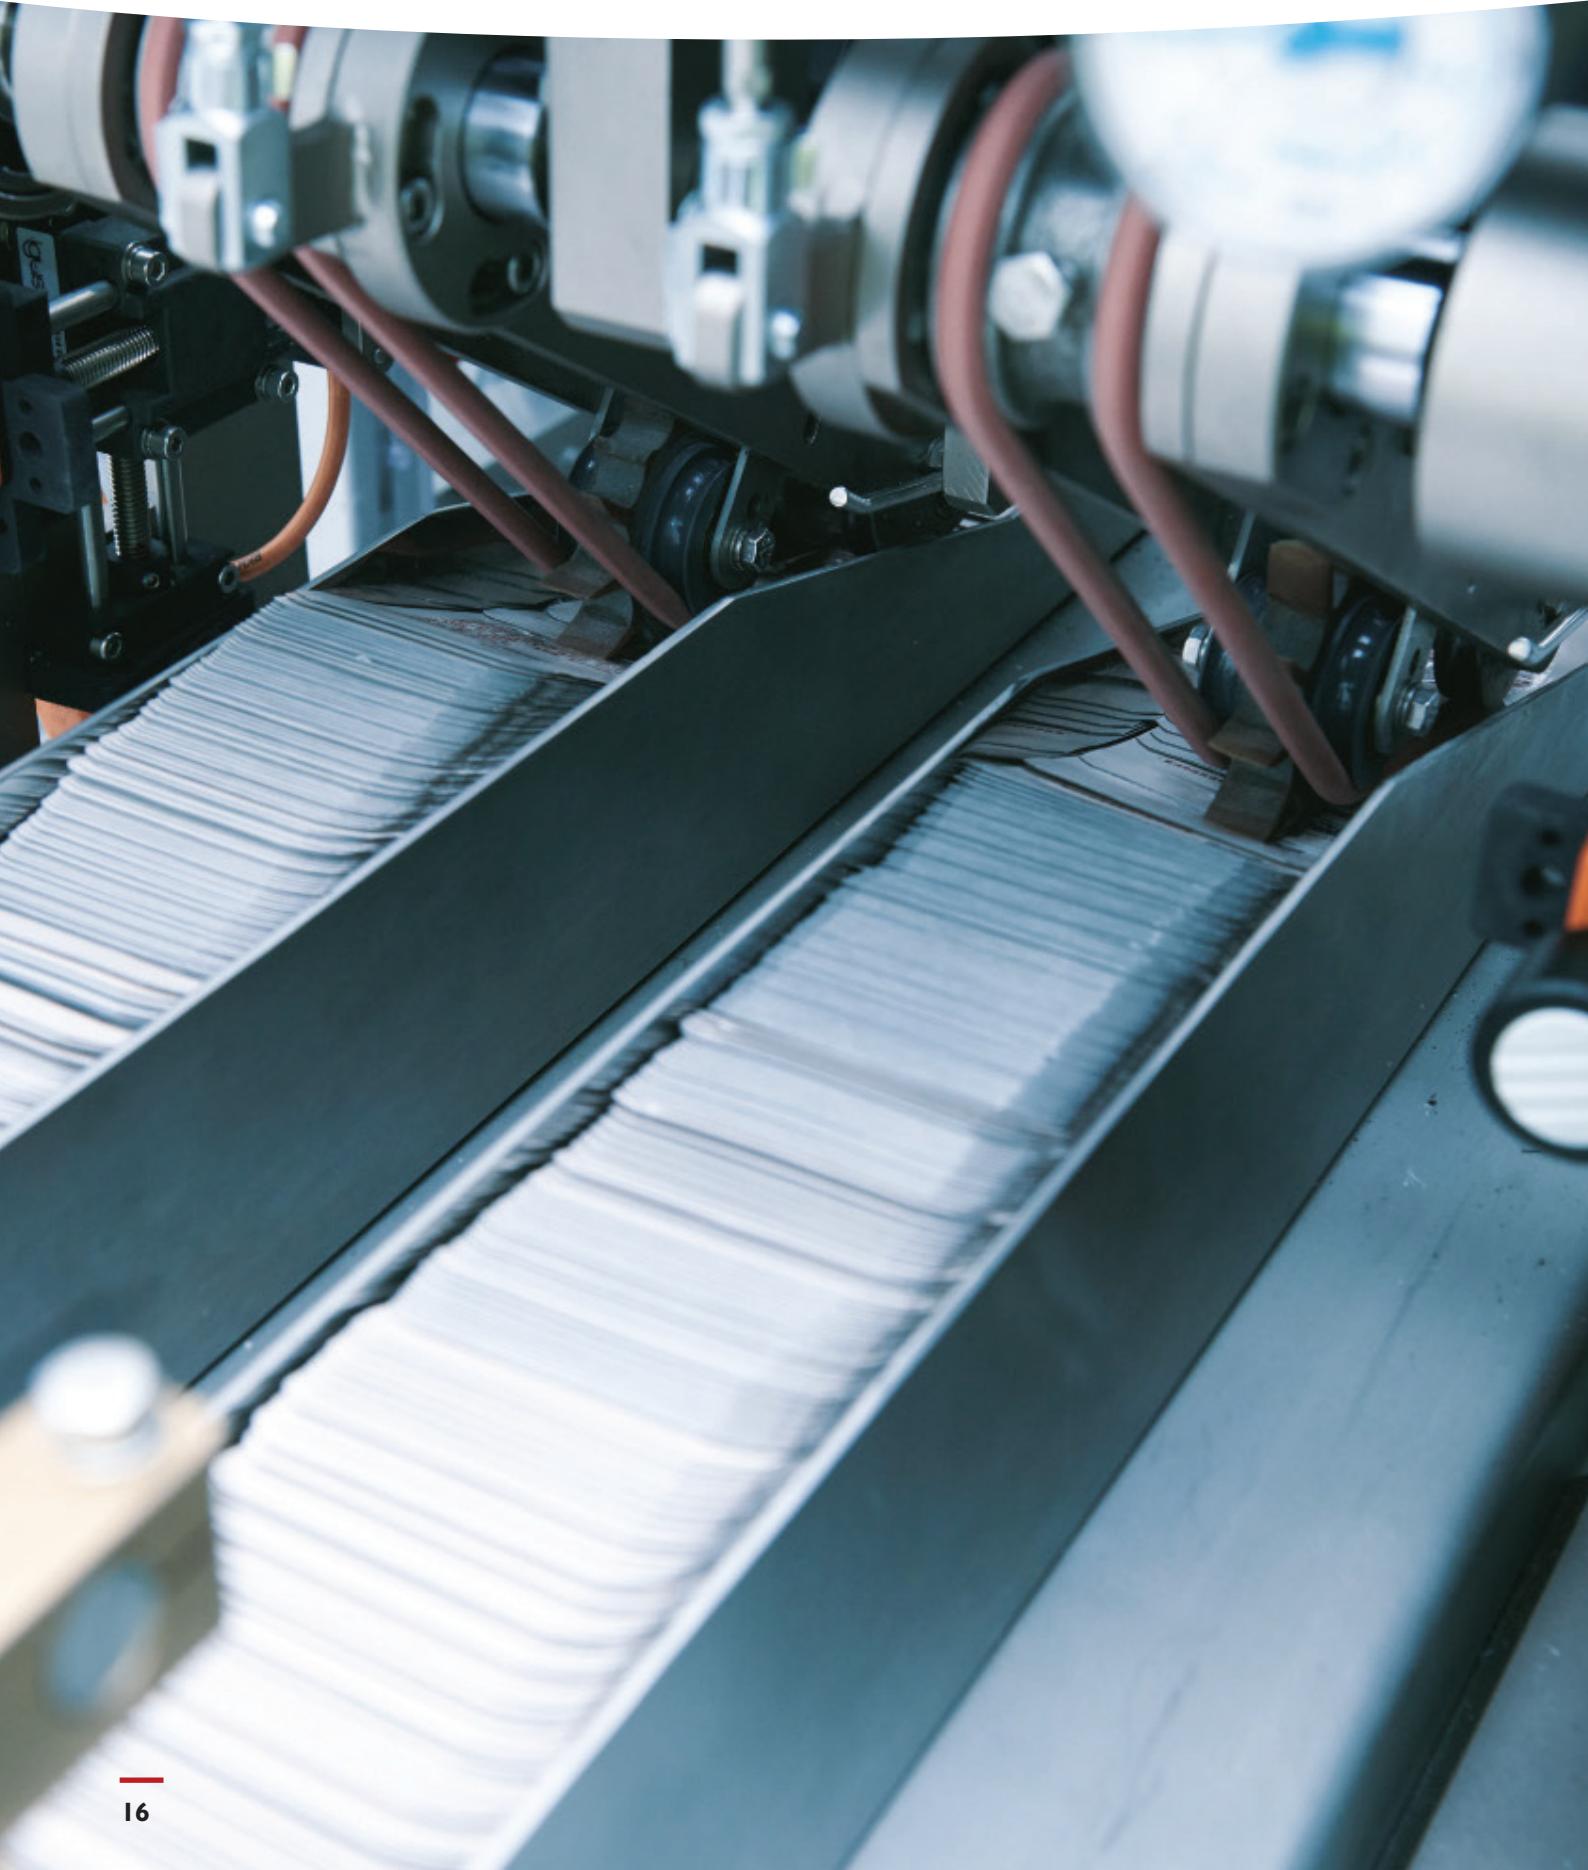

- The high-efficiency automatic hard capsule production line can meet demands for production of multiple types and different sizes of hard capsules including probiotics capsules and herbal extract capsules

Product applications

- L-carnitine Chromium yeast capsules
- Royal Jelly bee + Pollen capsules
- Coenzyme Q10 & Vitamin E capsules
- Maca + Zn + Epimedium extract capsules
- Reishi spore powder capsules

Other Delivery Formats

Probiotics

- Long-term research on the stability of probiotic products and data collection
- Separate probiotics workshop conforming to GMP and dedicated air conditioning system to prevent cross contamination
- Strict control over temperature and humidity as well as the activity of water in products to ensure long-term stable quality
- Working in cooperation with the premier probiotics raw material suppliers, we are able to select the most effective, stable and safe bacterial strains that are supported by clinical literatures. All of this ensures distinct product effects and reliable stability.

Product applications

- Series of probiotics products beneficial to gastrointestinal health, immune health, digestive health (from the mouth to the gut) and women's health
- Solutions for multiple dosage form such as powder, instant powder, hard capsules, tablet, softgel

Functional beverages

Glass bottles

- Advanced high-speed integrated production line can package 400 bottles products per minute
- The application of ultra-high temperature (UHT) flash sterilization and pasteurization can help retain activity of ingredients and keep good taste of products longer without using food preservatives
- The application of Clean in Place (CIP) system can improve safety
- The arrangement of different production lines can meet the production need of products ranging from 30 to 100 ml, and with different technological requirements

Portable packaging pouches

- Imported professional production line for flexible pouch liquid
- Fashionable appearance and packaging design
- Portable and lightweight
- Adaptable to multiple transportation conditions

Product applications

Collagen beverage series

- classical peach flavor
- classical mixed berry flavor
- upgraded Golden Delta TM beauty

Enzyme beverage series

- Noni fermentation juice
- Fermented fruit & Vegetable juice

The "Joy Life" beverage series

- Maca + Casein
- Y-Aminobutyric acid
- Blueberry flavor
- Colla corii asini
- Acerola cherry flavor
- Dietary fibre + L-carnitine
- Whey protein

Packaging Services

- Multiple automatic packaging lines
- Professional packaging team
- Providing clients with leading packaging concepts meeting various market positioning and product requirements
- Providing clients with diversified and personalized packaging solutions thanks to our excellent packaging solutions

- Bottle packaging (PET, PE, glass, etc.)
- Box packaging
- Tube packaging
- Plastic bag packaging
- Blister packaging
- Stick packaging
- Pillow packaging

Quality Management

- Total Quality Management (TQM) over the whole production process: ensure quality control and risk assessment through all steps forms a strict quality control system
- **Professional team**
 - 100+ experienced quality team members
- **Workshop and quality control system up to GMP standards**
 - Quality control over the entire process from raw materials to **finished** products
 - Overall process traceable records
 - Pharmaceutical grade workshop (Grade D), 24 hours contant temperature and humidity
 - Purified water meeting the standards of European Pharmacopoeia
 - Supplier audit program
 - File management
 - Regulatoru training
 - Implementation and certification of industry standards
- **In-house laboratory**
 - 14,000 sq.ft in-house lab
 - 400+ inspection instruments
 - 100+ batches of raw materials and finished products inspected each day
 - The operational environment separating man from machine can protect employees' long term health
 - Accredited by CNAS, our analytical centre can provide our customers with authoritative and credible COAs recognized internationally
